

CUSTOM MOLDING ON DEMAND

FASTEK supplies custom plastic injection molded and zinc die cast components to the window industry worldwide. We provide the highest level of quality and service to our customers.

FASTEK'S 20-year success with both zinc and plastic molding is based on in-house design and tooling capabilities, state-of-the-art powder painting and automated assembly. We're the low cost on-time supplier to the window industry.

Whether you have an existing component or a new design/concept, FASTEK supplies a quality product at a competitive price faster than anyone in the industry. FASTEK provides prototypes, preproduction test quantities and full products runs.

FASTEK is the perfect finish for your window components product.
