

PROFILGLASS

innovative ig spacer and grid solutions

CORPORATE OVERVIEW

Based in Italy, since 1982 Profilglass has become the leading producer of spacer bar and grid materials for the European market. Profilglass's growth is a testament to their commitment to produce high quality, value added products combined with advanced manufacturing techniques.

Profilglass produces an innovative line of **powder coated, welded** Muntin Bar. Profilglass's Muntin offers a unique structural rigidity and scratch resistance not found in domestic products.

Profilglass's manufacturers a complete line of induction welded mill and anodized ig spacer for residential and commercial applications.

Currently, Profilglass exports to 85 different countries. In the United States, Ramapo Sales, headquartered in Fairfield, New Jersey stocks and distributes the complete Profilglass line of products.

MUNTIN BAR PRODUCTS

- ❖ Powder Coated – scratch resistant finish practically eliminates touchup work.
- ❖ Induction Welded – adds rigidity for ease of handling and manufacturability.
- ❖ Rigid grids reduce the amount of grid “chattering” in large glass lites.
- ❖ Customized colors and laminated wood finishes available.

IG SPACER PRODUCTS

- ❖ Available in European Mill Finish, Anodized or Painted
- ❖ Compatible with most spacer benders
- ❖ True and Simulated Divided Lite programs
- ❖ Straight corner key connectors reduce scrap
